PROFESSIONAL SUMMARY

Detail-oriented and solution-focused software enthusiast with over 5 years of Software Development experience across REST API platforms, SQL-driven systems, and healthcare tech. Currently transitioning into Software Development with working knowledge of JavaScript, React.js, HTML5, CSS3, and RESTful APIs. Known for sharp debugging skills, database querying expertise, and collaborative problem-solving with cross-functional teams. Seeking a developer role to contribute clean code, technical precision, and end-user impact.

TECHNICAL SKILLS

Languages & Tools: Java Spring Framework & Microservices Architecture(Beginner), JavaScript, React.js, HTML5, CSS3, Python (Beginner), Bash

Databases: MySQL, MSSQL, Oracle SQL Developer

Frameworks: REST API Integration, FHIR, HL7

Testing: Manual (Blackbox/Whitebox), Code Review, Log-based Debugging

Platforms Used: Linux(Fedora, Garuda, Ubuntu), Headless CMS (Contentstack),

Other: Git, Jira, DML/DDL Commands, Dataflow Analysis, Troubleshooting

A personal portfolio website showcasing my skills and projects.

PROFESSIONAL EXPERIENCE & PROJECTS

April 2025 - current FreeLancing/Self-Driven Software Development Projects uploaded to my Github Profile:

- Building Visiomatix Website in React using react-router-dom, helmet-async for SEO, along with Chat application in backend using Java spring boot for Visiomatix site.
- Building a portfolio to attract more clients for projects.
- Working on REST API Backend for ECOMMERCE API (a WIP project)

- Debugging ECOMMERCE REST API with MySQL and Oracle DB
- Learning and Building Basic ReactJS Templates.

- **Technical Support Engineer – Quest2Travel, Mumbai**

Sep 2024 – April 2025

- Managed onboarding and support for the expense management module using Oracle SQL Developer.
- Executed DDL/DML commands to troubleshoot platform-level issues.

- **Technical Support Engineer – eClinicalWorks, Mumbai(Remote)**

Jan 2022 – Mar 2024

- Provided advanced Software Development Support to U.S.-based healthcare clients.
- Reviewed logs, replicated issues, and executed DML queries (MSSQL, MySQL).
- Supported FHIR/REST API implementation and provided vendor-side debugging for HL7 integrations. Used Flyway migrations in Springboot for projects, provided code review and debugging to the developer based clients for FHIR API.

- **Software Support Restolabs, Noida(Remote)**

Sept 2020 - Dec 2021

1. Offering email Development to clients in the United States and the UK, managing and addressing escalations with the Development team.
2. Establishing the framework for internal and external technical support documentation.
3. Participating in client calls and business development discussions, diligently documenting enhancement requirements, and identifying bug issues.

- **Customer Success Engineer – Contentstack Pvt. Ltd., Virar**

Feb 2020 – Aug 2020

- Supported REST API call flow for Headless CMS using JavaScript and React.js; led incident resolution and Jira tracking.

- **Technical Support – eZee Technosys Pvt. Ltd., Surat**

May 2019 – Dec 2019

- Conducted fault detection and initial troubleshooting for client-server software solutions globally.

PROJECTS

E-Book Sharing Website | JavaScript, HTML5, CSS3

A fully functional website enabling users to upload, browse, and download e-books.

Attendance Management System | Java + MySQL

Built a student attendance system with an admin dashboard, record updates, and reports.

Face Recognition App (C# + OpenCV)

Diploma final year project enabling face-based user recognition for secure access.

EDUCATION

B.Tech – NMIMS University (MPSTME) | 2019

Diploma in Computer Engineering – MMBGIT Mumbai | 2015

SSC – The Bishop's High School | 2010

LANGUAGES

English, Hindi, Marathi, Gujarati
